Re: House Bill 227

To Whom It May Concern:

We physicians at the Helena Pediatric Clinic are opposed to House Bill 227. We feel that it is very important for the health and safety of the children in Montana that they be immunized. Children who are not immunized are not only a risk to themselves but also a risk of carrying infectious diseases to other children attending daycare.

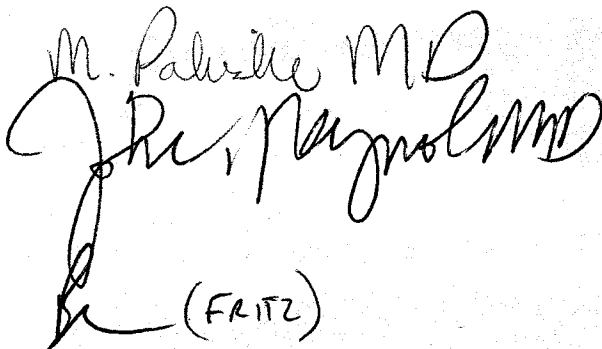

I hope this information is helpful to you.

Sincerely,

Erin Keefe, M.D.
